-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-4, 14, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Richa (2,284,232). Richa discloses an apparatus for finishing garments having an inflatable body portion that is made up of a plurality of cavities. Cavities 98 are both directly inflated from branches 102 and 103 of the T-shaped fitting 99. The main cavity of the body portion is inflated indirectly through the perforations in the T-shaped fitting 99 that separates the main cavity from the other cavities. With respect to Claim 2, the main body portion of the apparatus is air-permeable. With respect to Claims 3 and 4, the T-shaped fitting is an air-permeable material and has a valve through which air can flow. With respect to Claim 14, the perforations in the T-shaped member inherently cause the air to pass through the wall of the T-shaped member more slowly than air passing through the T-shaped member in the direction of the shoulder cavities. With respect to Claim 18, the apparatus treats shirts.

Allowable Subject Matter

3. Claims 5-13 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
